The following are the conditions of sale:—

1. The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2. The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which

provision is made by clause 13 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3. The sale shall commence at the hour of 11 A.M., of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4. Each lot shall contain five chests.

5. A Promissory Note for a sum, calculated according to the scale, noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal receipts or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

DEPOSIT.

When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest.
On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest.
On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest.
And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400.

6. The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7. The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8. No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale, will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9 The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10. Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

11. No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12. The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India Notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13. With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold for less than Rs. 800 below the minimum price of Rs. 800 specified in the second of these conditions.

14. The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16. The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, Certificate of the opium advertised for sale; No. 2, Report of the examination of such opium.

17. The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1901-1902, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

Secretary.

Chief Secy. to the Govt. of Bengal.

JAILS.

Camp Delhi; the 1st January 1903.

RESOLUTION.

No. 1.—The Governor-General in Council has been pleased to issue orders as follows for the release, as an act of clemency and grace, of a certain number of prisoners, both criminal and civil, and the remission of a portion of the sentences of other prisoners in all the Jails throughout British India, and in the Penal Settlement of Port Blair, on the auspicious occasion of the Coronation of the KING-EMPEROR.

2 Local Governments and Administrations have been desired to release on this day 10 per cent. of all the convicts under sentence, provided that their conduct during imprisonment has been good and that their release is not likely to give rise to a revival of

blood feuds or professional crime. Under these orders 9,123 offenders will be released. Special consideration has been given to the question of the release of Burmans convicted of dakaiti and similar offences during the disturbances which followed the annexation of Upper Burma, and the release of 127 such convicts has been decided on. Apart from the foregoing concession, His Excellency in Council has, as additional measures of clemency and grace, directed the release (1) of 1,238 female convicts whose offences were not of a serious nature; (2) of 4,909 persons under sentence of one month's imprisonment or less who have on this day worked out half their sentence; and (3) of 276 persons under sentence of not more than six months' imprisonment, whose offences were more or less attributable to conditions of scarcity. The Governor-General in Council has also directed the absolute release of 352 male and female convicts in the Andamans, and the conditional release of 31 convicts under sentence for dakaiti. The total number of convicts of all classes at Port Blair who will be released in connection with the celebration of the Coronation of the KING-EMPEROR will thus be nearly 400.

3. The Governor-General in Council has also been pleased to extend a measure of grace and clemency to convicts in Indian Jails who in the interests of society cannot now be released, by directing that they be granted remissions of their punishments, graduated according to the character of the sentence in each case, which may extend to a month's remission for each year of imprisonment passed in Jail. His Excellency in Council has further sanctioned, in the case of all well-behaved convicts in the Penal Settlement of Port Blair, certain concessions which will mitigate the severity of their sentences and will improve their prospects of earning further privileges by continued good behaviour.

4. The Governor-General in Council has been pleased to order the release of all persons confined in prison in execution of decrees of the Civil Courts whose debts do not exceed the sum of Rs. 100, provided that they are poor and not fraudulent; and the payment by Government of the debt or debts for which they are detained. One hundred and thirty-two civil prisoners will accordingly be discharged, and their debts aggregating Rs. 8,590 will be paid by Government.

5. The total number of prisoners who will to-day be released from British Jails, including the Andamans, is 16,188.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

POSTAL NOTICE.

DELHI CORONATION DURBAR.

IN order to facilitate the early delivery of postal articles intended for persons residing in any of the camps at Delhi during the Coronation Durbar, the public are requested to specify clearly in the address the name of the particular camp in which the addressee is residing and to add the words "Delhi Coronation Durbar" or "Delhi Durbar" as the *last* words of the address. It is particularly requested that the name of the post town "Delhi" may not be added as the last word of the address, as articles intended for the camp which are so addressed will, in the first instance, have to be sent to the permanent post office at Delhi, and will consequently be delayed.

PACIFIC OCEAN, SOUTH—NEW HEBRIDES AND TORRES ISLANDS.

Espiritu Santo Island—Bank to the westward.

Hayter bay, Middle Island—Reef extended.

THE British Admiralty has given notice (No. 903 of 1902) of the existence of a bank composed of rock, coral, and shells, about 3 cables in length, in an easterly and westerly direction, and 1½ cables in breadth, with a least depth of 7 fathoms, situated with cape Lisburn bearing S. 48° E., distant 19 miles, and peak (2,950 feet) on the coast N. 48° E.

Approximate position, lat. 15° 23½′ S., long. 166° 34′ E.

The water was a little discoloured and the sea broke slightly over this bank.

A reef situated about four miles to the south-westward of the above, marked P.D. on the Admiralty Chart, was reported by H.M.S. *Conflict* in 1876, a sounding of 9 fathoms having been obtained on it in approximately lat. 15° 24′ S., long. 166° 30′ E., but since that time H.M.S. *Wallaroo* has passed over this position on three occasions without observing any indication of this danger. It is consequently assumed that the shoal reported by the *Conflict* is identical with that now fixed by the *Phœbe.*

TORRES ISLANDS—MIDDLE ISLAND.

Also that the reef at the head of Hayter bay, Middle island, of the Torres group, extends about 1½ cables farther into the bay than shown on the Chart. Landing in this bay is only possible near high water: no boat passage could be seen at low water. There is no mission station here.

The mean pressure, temperature, &c., are deduced from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ≏, dew; ≡, fog.

PACIFIC OCEAN, SOUTH—NEW HEBRIDES AND TORRES ISLANDS.

Espiritu Santo Island—Bank to the westward.

Hayter bay, Middle Island—Reef extended.

THE British Admiralty has given notice (No. 903 of 1902) of the existence of a bank composed of rock, coral, and shells, about 3 cables in length, in an easterly and westerly direction, and 1½ cables in breadth, with a least depth of 7 fathoms, situated with cape Lisburn bearing S. 48° E., distant 19 miles, and peak (2,950 feet) on the coast N. 48° E.

Approximate position, lat. 15° 23½′ S., long. 166° 34′ E.

The water was a little discoloured and the sea broke slightly over this bank.

A reef situated about four miles to the south-westward of the above, marked P.D. on the Admiralty Chart, was reported by H. M. S. *Conflict* in 1876, a sounding of 9 fathoms having been obtained on it in approximately lat. 15° 24′ S., long. 166° 30′ E., but since that time H. M. S. *Wallaroo* has passed over this position on three occasions without observing any indication of this danger. It is consequently assumed that the shoal reported by the *Conflict* is identical with that now fixed by the *Phœbe*.

TORRES ISLANDS—MIDDLE ISLAND.

Also that the reef at the head of Hayter bay, Middle island, of the Torres group, extends about 1½ cables farther into the bay than shown on the Chart. Landing in this bay is only possible near high water: no boat passage could be seen at low water. There is no mission station here.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1902.

WEATHER during December was fine and settled over the Province, with the exception of one period about the end of the third week, when a disturbance of an unusual kind developed over Central India, and moving in a south-easterly direction over the south and centre of the Bay, caused cloudy showery weather in the south-western districts of Bengal and a few days later in Burma. The exceptional character of the disturbance is shown by the rainfall in Orissa, which on an average for the Division was more than seven times the normal amount for December. The fall in South-West Bengal was also above the normal, and Chota Nagpur and East Bengal received light showers, but in North Bengal and Bihar there was no rain during the disturbance, nor at any other time throughout the month.

The north-east monsoon continued later the usual in the south of the Bay, and squally weather with cloud and rain was experienced in the extreme south at intervals to the end of December. There was no severe disturbance on the Madras coast, but three occasions of slightly disturbed weather occurred at the beginning of the month, in the middle, and towards the end. In each case the pressure gradient intensified, winds strengthened somewhat, and more or less heavy rain fell at the Madras coast stations

In the early part of the month, and until towards the end of the third week, fine weather of the usual cold-season character prevailed in Bengal. Winds were north or north-west, the pressure distribution was practically normal, with the usual small oscillations characteristic of settled conditions, and temperature was lower than usual, though not to any great extent.

On the 15th a slight depression crossed the Madras coast from the Bay, moving in a westerly direction. It almost immediately disappeared, and for some days the barometer gave no indication that the depression was still in existence. From the changes of temperature, however, which are, for slight disturbances, a safer means of tracing their course than pressure changes, there is some reason to believe that the depression which crossed the Madras coast on the 15th continued to exist, and following the usual course in November and December, turned northwards and then eastward. A disturbance crossed the Kathiawar coast on the 20th and a well defined shallow depression was shown over Central India on the 21st, after which cloudy weather with rain began on the east side of the depression and extended over the south-western parts of the Province. Between the disturbance on the Madras coast on the 15th and the one on the Kathiawar coast on the 20th there is no direct connection, as the pressure changes were small and winds light or irregular; but the course of more severe disturbances in past years and the brief interval of time between those two recorded sets of phenomena make it not improbable that they belong to the same disturbance, and that during the intervening days the instruments at the ground level were not affected.

In one respect the disturbance was exceptional. Whether it entered India in the neighbourhood of Kathiawar or commenced over Central India, the most likely direction of motion would be eastward, and not, as in this case, south-eastward Also such disturbances usually disappear over the Bay and rarely cause disturbed weather in Burma. In the case under consideration the disturbance crossed the Bay very slowly, and entering Burma, caused general cloud and rain in the south—a most unusual occurrence at that season of the year.

Rainfall began in Orissa, Chota Nagpur, and South-West Bengal on the 21st, but there were only scattered showers. On the 22nd heavy rain for the season fell at most of the Orissa stations and in part of South-West Bengal, while the extension of the showers to East Bengal showed the easterly movement of the disturbance. The heaviest falls of the 22nd were more than 2 inches at Jagatsingpur and Banki in the Cuttack district and at Pipli in the Puri district. Light showers continued fairly general in the southern districts on the 23rd, and thereafter until the end of the month weather was rainless over the Province.

Rainfall began in Burma on the 28th and continued on the 29th. The interval, therefore, between the commencement of disturbed weather in Orissa and in Burma is about the same as that between its commencement in Madras and in Kathiawar in its earlier stage. The evidence, however, of connection in the latter case is stronger than the former, because of the wave of falling temperature which followed the rainfall eastward over India and extended slowly eastward as far as Burma between the 22nd and 28th.

Pressure underwent no great change either over the Province or the Bay throughout December. Such depressions as formed were, so far as indicated by the barometer, of the slightest, and the small oscillations were not greater than occur at any time in what is called settled weather. But pressure was more frequently below than above the normal, and means for the month in Bengal are below the normal for the month at all stations The greatest defect is ·02 inch in parts of Orissa, South-West Bengal, Bihar, and North Bengal. Several slight depressions were shown in the extreme south-west of the Bay, and during those times there was some increase in the gradient with slightly stronger winds. The shallow depression which crossed the centre of the Bay during the last week of the month has already been referred to.

Temperature.—The most noticeable feature of weather conditions, apart from the rainfall in the south-west of the Province between the 21st and the 23rd and in Burma on the 28th and 29th, was the eastward movement of a wave of temperature changes in connection with

the disturbance to which that rainfall was due. Between the 15th and 20th high temperature developed over Central India, and moving south-eastward it was followed by equally low temperatures which prevailed during the last week.

In Bengal neither maximum nor minimum temperatures differed to any great extent from the normal, and in places there was a small excess, chiefly in the western districts. Mean defect in Assam was 1·7° ; in North and East Bengal and Bihar about 1°, while in the south-western districts, which came more under the influence of the wave of rising temperature at the end of the third week, mean temperature was practically normal.

Rainfall was confined to the south of the Province and was light in East Bengal and Chota Nagpur. Heavier falls occurred in Orissa and the adjacent part of South-West Bengal on the 22nd, and no rainfall was recorded in any part of Bengal, except between the 21st and 23rd.

The average fall in Orissa was 1·85 inches—more than seven times what usually falls in December; in South-West Bengal a quarter of an inch, and in East Bengal and Chota Nagpur about ·1 inch.

The following table gives the average rainfall for each Division, month by month, throughout the year, expressed as a percentage of the normal fall for each month :—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

PACIFIC OCEAN, SOUTH—NEW HEBRIDES AND TORRES ISLANDS.

Espiritu Santo Island—Bank to the westward.

Hayter bay, Middle Island—Reef extended.

THE British Admiralty has given notice (No. 903 of 1902) of the existence of a bank composed of rock, coral, and shells, about 3 cables in length, in an easterly and westerly direction, and 1½ cables in breadth, with a least depth of 7 fathoms, situated with cape Lisburn bearing S. 48° E., distant 19 miles, and peak (2,950 feet) on the coast N. 48° E.

Approximate position, lat. 15° 23½′ S., long. 166° 34′ E.

The water was a little discoloured and the sea broke slightly over this bank.

A reef situated about four miles to the south-westward of the above, marked P.D. on the Admiralty Chart, was reported by H. M. S. *Conflict* in 1876, a sounding of 9 fathoms having been obtained on it in approximately lat. 15° 24′ S., long. 166° 30′ E., but since that time H. M. S. *Wallaroo* has passed over this position on three occasions without observing any indication of this danger. It is consequently assumed that the shoal reported by the *Conflict* is identical with that now fixed by the *Phœbe.*

TORRES ISLANDS—MIDDLE ISLAND.

Also that the reef at the head of Hayter bay, Middle island, of the Torres group, extends about 1¼ cables farther into the bay than shown on the Chart. Landing in this bay is only possible near high water: no boat passage could be seen at low water. There is no mission station here.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; z, lightning.

Bills of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following Draft of a Bill to amend the Bengal Excise Act, 1878, together with a Statement of Objects and Reasons, is hereby published for information:—

DRAFT OF

A

BILL

To amend the Bengal Excise Act, 1878.

WHEREAS it is expedient to amend the Bengal Excise Act 1878, in manner hereinafter appearing; Bengal Act VII of 1878.

It is hereby enacted as follows:—

Short title. 1. This Act may be cited as the Bengal Excise (Amendment) Act, 1903.

Insertion of new clause in section 28. 2. After the words "under this Act" in section 28 of the Bengal Excise Act, 1878, the following clause shall be inserted:—

"Without prejudice to the generality of the foregoing provision, conditions on all or any of the following matters may be imposed under this section:— Conditions to be attached to licenses.

(1) for fixing the place of retail sale and the places from which exciseable articles for purposes of retail sale may be obtained;

(2) for prohibiting the transfer of a license by the person to whom such license was originally granted to any other person;

(3) as to the hours during which licensed premises may, or may not, be kept open;

(4) as to the persons or classes of persons to whom a licensee may, or may not, sell exciseable articles;

(5) as to the persons or classes of persons who may, or may not, be employed by a licensee to assist him in his business, whether in the sale of liquor or in any other capacity whatsoever;

(6) as to the keeping by licensed vendors of accurate accounts of the sales of exciseable articles in such form as may from time to time be fixed by the Board;

(7) as to the placing of sign-boards over the shops of licensed vendors in such form as may be fixed by the Board."

3. In section 67 of the said Act between the word "shop" and the word "or" the words "or permits persons of notoriously bad character to meet or remain in his shop" shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

UNDER section 28 of the Bengal Excise Act (Bengal Act VII of 1878), the Board of Revenue has power to regulate the form and conditions of all licenses granted under the Act.

It is proposed to amend the Act so as to show plainly what conditions may be attached to such licenses.

The conditions stated in the Bill include such matters as affect the proper management of licensed shops, and the non-observance of any one of these conditions may result in the cancellation of the license under section 29 of the Act, while the licensee will be liable to punishment under section 59 of the Act.

Licensed vendors are further liable to penalties under section 67, for certain breaches of public order. Opportunity has been taken to amend this section so as to prevent licensed shops from being used as a meeting place for persons of notoriously bad character.

V of 1881.

3. In the Probate and Administration Act, 1881, the following amendments shall be made, namely :—

Amendment of sections 59, 60, 62, 64 and 69, Act V, 1881.

(*1*) In section 59, for the proviso the following proviso shall be added, namely :—

"Provided that probates and letters of administration granted—

(*a*) by a High Court established by Royal Charter, or

(*b*) by the Chief Court of the Punjab or of Lower Burma, or

(*c*) by a District Judge, where the deceased at the time of his death had his fixed place of abode situate within the jurisdiction of such Judge, and such Judge certifies that the value of the property affected beyond the limits of the Province does not exceed ten thousand rupees,

shall, unless otherwise directed by the grant, have like effect throughout the whole of British India"

(*2*) For section 60 the following section shall be substituted, namely :—

"60 (*1*) Where probate or letters of administration has or have been granted by a Court with the effect referred to in the proviso to section 59, the Registrar or such other officer as the High Court or Chief Court which made the grant, or to which the District Judge making the grant is subordinate, appoints in this behalf, shall send to each of the other High Courts or Chief Courts, empowered to make such grants a certificate to the following effect, namely :—

'I, *A. B*, Registrar [*or as the case may be*] of the High Court of Judicature at [*or as the case may be*], hereby certify that on the day of the High Court of Judicature [*or* Chief Court, *or* District Judge] at [*or as the case may be*] granted probate of the will [*or* letters of administration of the estate] of *C. D.*, late of , deceased, to *E. F.* of and *G. H.* of , and that such probate [*or* letters] has [*or* have] effect over all the property of the deceased throughout the whole of British India ;'

and such certificate shall be filed by the Court receivin the same.

(*2*) Where any portion of the assets has been stated by the petitioner, as hereinafter provided in sections 62 and 64, to be situate within the jurisdiction of a District Judge in another Province, the Registrar or other officer required to send the certificate referred to in sub-section (*1*) shall send a copy thereof to such District Judge, and such copy shall be filed by the District Judge receiving the same."

(*3*) To sections 62 and 64, respectively, the following paragraph shall be added, namely :—

"Where the application is to the District Judge and any portion of the assets likely to come to the petitioner's hands is situate in another Province, the petition shall further state the amount of such assets in each Province and the District Judges within whose jurisdiction such assets are situate."

(*4*) To section 69 the following paragraph shall be added, namely :—

"Where any portion of the assets has been stated by the petitioner to be situate within the jurisdiction of a District Judge in another Province, the District Judge issuing the same shall cause a copy of the citation to be sent to such other District Judge, who shall publish the same in the same manner as if it were a citation issued by himself."

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to empower District Judges in certain cases to grant probates of wills and letters of administration having effect throughout British India. As the law at present stands, probates and letters of administration having effect throughout British India can be granted only by a High Court or a Chief Court, and this restriction has

been felt to be a hardship to the relatives of persons dying in up-country stations. It is proposed therefore to attach to the grant of probate or letters of administration by a District Judge the same territorial currency as that which is attached to a grant made by a High Court or Chief Court, but subject to the restrictions (1) that the deceased at the time of his death had his fixed place of abode situate within the jurisdiction of the District Judge, and (2) that the Judge certifies that the value of the property affected, beyond the limits of his Province, does not exceed ten thousand rupees.

2. Sufficient safeguards against injustice resulting from the proposed legislation appear to be afforded by section 263 of the Indian Succession Act, 1865 (X of 1865), and section 86 of the Probate and Administration Act, 1881 (Act V of 1881), under which every order made by a District Judge in the matter of probate or administration is appealable to the High Court; and also by the fact that a grant of probate merely perfects the representative title of an executor to the property which belonged to the deceased and over which the testator had a disposing power, but does not confer any title to property which the testator had no right to dispose of.

STATEMENT OF OBJECTS AND REASONS.

An extensive and costly scheme of light-house construction and illumination has been undertaken, and it is proposed to meet the cost by levying dues on vessels, of the burden of thirty tons and upwards, deriving benefit from the lights. The *maximum* rates at which the dues may be levied are specified in the schedule annexed to the Bill, and are subject to reconsideration. The rates at which the dues will be levied will be fixed by the Government, subject to these *maxima* as ultimately settled, and will be so fixed from time to time as to meet the interest on capital outlay, maintenance charges, and a small sinking fund charge.

The procedure clauses of the Bill are based on the provisions of the Burma Coast-lights Act, 1879 (IX of 1879).

RESOLUTION ON THE REPORTS ON THE CENSUS OF CALCUTTA AND ITS SUBURBS FOR 1901.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 30th January 1903.

RESOLUTION—No. 351.

READ—

The reports on the Census of Calcutta and its Suburbs for 1901, by Mr. A. K. Ray of the Provincial Civil Service and Mr. J. R. Blackwood, I.C.S., Deputy Chairman to the Corporation of Calcutta.

THE Census of Calcutta and the three Suburban Municipalities, Cossipore-Chitpur, Manicktola and Garden Reach, which was taken on the 1st March 1901, was made under the supervision of the Deputy Chairman of the Calcutta Corporation.

2. The Report on this census was received in the Secretariat in October 1902 and is contained in four volumes. The first of these is written by Mr. Atul Krishna Ray of the Provincial Service, and is devoted to a history of the town, while the remaining volumes, for all of which Mr. J. R. Blackwood, the Deputy Chairman of the Corporation, is responsible, contain respectively (II) the Administrative Report, which gives an account of the arrangements made for taking the census and for compiling the results, (III) the Tabular Statistics and (IV) the Report proper.

The Report.

2. Mr. Ray's history of the town of Calcutta goes back to the time of legend and tradition relating to the shrine of Kalighat and Kalikshetra or the "field of Kali," and the writer after reciting the brief notices of this locality which history, previous to the British advent, has preserved, takes up in detail the tale of the growth of the town from the settlement of Job Charnock in 1690. Mr. Ray makes a careful examination of the puzzling figures contained in the former estimates and countings of the population, summarises the principal measures taken from time to time in municipal administration and improvement, and notices the development of the port and its trade. He also describes localities and buildings, and explains the meaning of the names of streets, ghâts and tanks.

Mr. Blackwood supervised the taking of the census of the town and suburbs of Calcutta with great success, and he has written an excellent report. The Lieutenant-Governor desires to express his cordial appreciation of the care and ability with which Mr. Blackwood and Mr. A. K. Ray, Assistant Census Officer, carried out their important and arduous task and he desires also to express his acknowledgments of the assistance given by the Calcutta Police and by many other officials and non-officials which conduced to the successful results which have been obtained.

The results of the census.

3. The total population of Calcutta is 949,144, (including its three suburbs of Cossipore-Chitpur, Manicktola, and Garden Reach which, together have a population of 101,348). The total 847,796 shown in Mr. Gait's Census Report for the Province excludes these three suburbs. He remarks that if Howrah, which is really as much a part of Calcutta as Southwark is of London, be included, the population of the Metropolis of India is very nearly 1,107,000, which is greater than that of any European city, except London, Constantinople, Paris and Berlin, and of any city in America, except New York, Chicago and Philadelphia. Excluding the cities of China, the population of which is uncertain, the only city in Asia with more inhabitants than Calcutta is Tokio.

The expansion of the population of Calcutta and its suburbs during the last decade appears according to the returns to exceed 24 per cent., but no doubt this is due in part to a more accurate enumeration.

Next to the general expansion of the population of the town, which proceeded during the last century, as Mr. Blackwood points out, at a more rapid rate even than that of London, the most prominent features of the Report are the

predominance of males over females, and the increasing immigration of up-country men, especially from Bihar and the United Provinces.

Males outnumber females in the proportion of 19 to 10—a disproportion which is largely due to the large number of immigrants who have come to the city for work, but who have left their women behind them at home.

Europeans and Eurasians (of whom the latter slightly outnumber the former) make up rather more than 3 per cent. of the population of Calcutta itself. Hindus are 65 per cent. of the whole population, Muhammadans rather less than 30 per cent., and Christians rather more than 4 per cent., leaving 1 per cent. for persons of other religions. The census records show that fifty-nine languages are spoken in Calcutta; Bengali, which of course predominates, is spoken by nearly five lakhs of people, but more than three-and-half lakhs speak Hindustani; next in numbers at a long interval come the speakers of Uriya and English. More than three-fourths of the population are illiterate.

Classified by occupations the largest number of persons, viz., 326,922 is returned under "Preparation and supply of material substances"; next come 220,906 persons engaged on "Commerce, transport, and storage," and then 157,387 persons employed in personal service.

ORDERED that this Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE FORMATION OF SCHOOL COMMITTEES.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 31st January 1903.

RESOLUTION—No. 352.

Letter No. 545, dated 27th November 1901, from the Government of India in the Home Department.

Letter No. 266, dated the 10th January 1902, from the Director of Public Instruction, Bengal.

Letter No. 6431, dated the 16th August 1902, from the Director of Public Instruction, Bengal, paragraphs 1 to 4.

Letter No. 2249G., dated the 11th March 1902, from Mr. H. Savage, Commissioner of the Dacca Division.

Letter No. 130., dated the 29th April 1902, from Mr. L. Hare, Commissioner of the Patna Division.

IN their letter No. 545, dated the 27th November 1901, the Government of India invited the attention of this Government to a suggestion made by the Directors of Public Instruction of the different Provinces in India, who took part in the Conferences on educational matters held at Simla in 1901. The suggestion in question was to the effect that the system of School Committees, which exists in the Central Provinces for schools of all grades, is strongly to be recommended on the ground that it tends to encourage and maintain local interest in education.

2. This system is prescribed in the rules which are quoted below from the Education Manual of the Central Provinces:—

"[Article] 29. The District Council shall entrust the supervision of education within the district to a School Board consisting of certain of its own members who take special interest in education, and, if the Council thinks fit, of other persons likely to give useful advice and assistance in the management of schools When such School Board has been appointed, it shall, subject to the general control of the District Council, conduct the management of District Council schools. The Secretary to the School Board shall be appointed by the District Council. The names of the proposed members of the School Board and of the Secretary to the Board shall be submitted for approval to the Deputy Commissioner, who may veto any appointment to a School Board. The number of members should not ordinarily exceed seven, any four to constitute a quorum. All questions relating to the appointment, promotion, reduction, suspension and dismissal of masters shall be, in the first instance, decided by the School Board. The proceedings of the School Board shall be laid before the next meeting of the District Council, and it shall be open to any member present at that meeting to raise a question as to any action taken by the School Board and set forth in the proceedings. If no such question is raised, the action taken by the School Board shall be deemed to have been ratified by the District Council.

"[Article] 30. The Local Board shall, subject to the control of the District Council, appoint a School Committee, consisting of not less than five residents of the area for which the school has been established for each District Council school. Not less than three members shall form a quorum. The Deputy Commissioner may veto any appointment to a School Committee or the removal of any member therefrom. Otherwise the School Committee shall hold office during the pleasure of the Local Board.

"[Article] 31. The School Committee shall visit the school collectively, once a month, at least, and a record of their proceedings shall be made in a book to be kept for the purpose. One of the members shall visit the school once a week at least.

[Article] 32. The School Committee shall take all possible measures to secure regularity of attendance, settle matters of discipline, and arrange, in accordance with the rules for the time being in force, what rates of fees scholars shall pay and what boys shall be free scholars. They shall also bring irregularities connected with the management of the school, the want of suitable accommodation or furniture, and the necessity for repairing the school buildings, etc., to the notice of the Local Board. Copies of their reports on the above matters shall be forwarded by the head-master, in the case of Anglo-Vernacular 1st grade middle schools, to the Inspector; and in the case of schools of lower grades, to the Deputy Inspector.

"[Article] 381. District Officers and their Assistants, also members of District Councils and Local Boards, are required to use their influence for the promotion of education, and to visit and inspect the schools within the district or local area, as occasion may require, and should note the results of their inspection in the visitors' book. Tahsildars and naib-tahsildars are required to submit quarterly returns of their visits to schools in the form given in Appendix E (17)."

The Education Reports of the Central Provinces show that the management of schools through committees is successful; and in the Report for 1900-1901 it is stated that the School Committees are the backbone of the educational system in those Provinces.

3. The Director of Public Instruction, Bengal, gives the following account of the working of existing School Committees in Bengal:—

I have, in the first instance, to give a brief general description of the present state of affairs in Bengal, starting, in the first instance, with the highest grade of schools of general instruction which exist in Bengal, namely, the high English schools. These may be divided into (*a*) collegiate or zilla schools, (*b*) aided, and (*c*) unaided schools under private management. In the case of Government collegiate and zilla schools, these act as model schools to all other high schools, and they are situated one in each district of the province. Again, in the case of Government schools, they are managed by the head-master, who is in direct subordination to the principal of the college in the case of collegiate schools, or by an Inspector of schools in the case of zilla schools, and the Principal and the Inspector are in direct communication with the Director of Public Instruction. These really form a kind of managing committee for the Government high schools As these schools are thus directly controlled by the Education Department, and paid for by Government, it does not appear desirable that they should have committees of management composed of outsiders. It may also be remarked that owing to the rapid spread of English education in Bengal, in the great majority of instances in near proximity to the zilla schools, private schools (aided and unaided) have sprung into existence, and in these local opinion finds proper expression. In the case of aided schools, practically each one has its own committee of management, though the amount of interest taken in the affairs of a school by the different local committees varies very largely. On the whole, however, it may be said that the local committees of schools do good work, and hence they should be encouraged and improved in every way possible. It is, nevertheless, much to be regretted that in a large number of instances these local committees of schools do not represent *all* the interests of the people who send their children to the schools, as should actually be the case if proper arrangements for teaching and courses of studies are to be secured. The local management has, I regret to say, very frequently drifted into the hands of the pleaders of the local bar, who form a most influential part of every mufassal town. It is, however, easier to point out this drawback than to suggest its remedy. Committees consisting mainly or largely of pleaders do not form an ideal governing body for a general school, and their tendency is frequently to encourage the literary side of education, and rather to discourage anything like practical education, or the kind of education that would lead to commerce, the various industries, trades, etc. In the case of (*c*) private schools, also, the majority of these have managing committees, and in such cases the same remarks as those given above apply, except in a few cases of more or less "venture" or "proprietary" schools, where, though a nominal managing committee may exist, practically the management rests in the hands of the proprietor of the school, and he, in many instances, runs it with the sole view of making as good a profit as possible.

Coming to the next lower class of schools, namely, the middle English and middle vernacular schools, it may be stated generally, that there are comparatively few under the direct management of Government or of District Boards; for about 70 per cent. are aided schools, and 20 per cent. unaided. In the case of all the aided, and the majority of the unaided schools, local managing committees do exist, but here again the tendency has been for the management to be monopolized by legal practitioners such as pleaders, muktears, &c.

Passing to the two divisions of the primary schools, the upper and the lower, it is in the first instance necessary to differentiate between girls' and boys' schools. In the case of girls' schools, even down to the lower primary stage—and these always are aided schools—it is usual for a managing committee to exist, the reason being that such managing committees have been found to be very useful in keeping up the local interest in female education.

On the other hand, in the case of the upper and lower primary schools for boys, which numerically constitute the great bulk of Bengal schools, managing committees do not exist at all. Hence it is in this direction that the principles laid down by the Government of India would have to be applied mainly. The number of these schools in Bengal in 1899-1900 was—

Upper primary schools	...	...	...	4,300
Lower ditto	...	...	...	43,807

4. The Lieutenant-Governor desires to record at once his agreement in the opinion expressed by Mr. Pedler that it is premature to dispense with departmental control and inspection by the officers of the Education Department. Such control and inspection should be maintained as formerly. At the same time it is most desirable that every effort should be made to educate public opinion and to utilize by the formation and development of School Committees all the available public spirit which exists in the cause of education.

Taking up the different classes of schools in Bengal in the order in which they have been mentioned by Mr. Pedler in his letter, from which extracts are given above, the following paragraphs consider what improvements of existing arrangements appear to be desirable and feasible in each case.

5. For Government Secondary schools, the Director has expressed the opinion that it is undesirable that committees of management composed of outsiders should be appointed. Mr. Bourdillon, however, is disposed to think that it would be advantageous for all the Secondary schools managed by Government, or by District Boards and Municipalities numbering 260 in all to have Visiting Committees, on which local residents adequately representing the classes from which the students are drawn should serve, say, for a period of two years. For Government schools the members of the Visiting Committees should be selected by the District Officer, in consultation with the Inspector of Schools; and for District Board and Municipal schools they should be selected by the Chairman from among the members of District and Local Boards and the Municipal Commissioners respectively. The Visiting Committees should have no power to issue any orders to the head-masters of schools, but their functions should be confined to the offering of advice, which will receive due consideration from the school authorities and the officers of the Education Department.

6. The aided Secondary schools, both High and Middle, number 1,627. These schools ordinarily have a committee of management already, and the Director is of opinion that it is only necessary to require that the parents of all classes should be properly represented on these committees. The present grant-in-aid rules contemplate the existence of committees of management for schools to which grants are made. It is accordingly laid down that committees for the management of them shall be maintained, that the members who serve on them shall be so selected as to represent all classes of the community, legal, commercial, trading, industrial, and agricultural; and that in order to secure this adequate representation the selection of members of the committees of management shall be approved by the District Officer in consultation with the Inspector of Schools in the case of Secondary schools aided by Government and by the Chairman of the District and Municipal Boards in the case of Secondary schools aided by District Boards and Municipalities.

7. The Upper and Lower Primary schools in Bengal number 4,507 and 44,079 respectively. The Director proposes the appointment of committees for Upper Primary schools only, and thinks it inadvisable for the present to press the formation of committees in the case of the Lower Primary schools. The Lieutenant-Governor agrees in this view, and directs that for the present attention shall be confined to the formation of committees for Upper Primary schools for boys. For such schools, committees should be appointed wherever it is possible, and ordinarily the members of the Chaukidari Union should be appointed members of the school committees, wherever the Union system has been introduced; but it is recognized that all districts are not yet ready for this step, and it must therefore be considered in what districts the scheme should first be introduced.

The following rules have been drawn up in consultation with the Director of Public Instruction, Bengal, and with Messrs. Hare and Savage, Commissioners of the Patna and Dacca Divisions: they provide for the appointment of committees of management for aided Upper Primary schools and for their working, and are provisionally approved.

Rule 1.—For every Upper Primary school which is in receipt of public money there shall be constituted a school committee consisting of three or five educated men of influence in the locality, one of whom shall act as Secretary.

Rule 2.—The members shall be appointed and removed by the Chairman of the District Board, or in the case of schools in municipalities by the District Magistrate, and one member shall be appointed by the same authority to be President.

Rule 3.—The duties of the committees shall be—

(1) To select a suitable place for holding the school, if one has not already been found;

(2) to raise funds for the improvement of the school and especially for—

(*a*) the construction and maintenance of the school-house;
(*b*) the provision of a school-garden and play-ground;
(*c*) the sanitation of the school building and its surroundings;
(*d*) the provision of school furniture, school appliances for teaching, etc.;

(3) to determine the holidays to be given to the school, and the hours for opening and closing the school;

(4) to assist in the conduct of the examinations *in situ* whenever required by a Deputy or Sub-Inspector of Schools; and

(5) to require a register of attendance to be properly maintained by the teacher.

(6) to inspect each school at least once a quarter, either collectively as a committee or in rotation as individual members, and to note in the inspection book the number of boys on the roll, the number in attendance on the day of inspection, and the number of days for which the school has been open during each quarter; also to record an opinion as to the progress made.

Rule 4.—The committee shall furnish copies of their proceedings to the Sub-Inspector of Schools for transmission to the District or Municipal Board.

Rule 5.—It shall be competent to the Chairman of the District or Municipal Board to suspend or annul any action of the local committee.

8. In addition to the development of the system of school committees for individual schools it seems to the Lieutenant-Governor to be very desirable to develop the General District Committees of Education which have been constituted in most districts in connection with the working of the District Boards. The Bengal Local Self-Government Act III of 1885 contains a section authorising the District Boards to make rules with regard to the work of sub-committees generally, but it does not contain any provision expressly recognising the Education Committees or sub-committees. It is therefore in contemplation to introduce into the Act a section similar to section 55, (which authorises the appointment of a Finance Committee,) expressly authorising the appointment of an Education Committee. This committee would consist of members of the District Board and such other residents of the district as might be selected by the Board and approved by the Commissioner of the Division.

Ordered, that this Resolution be published in the *Calcutta Gazette* for general information, that copies thereof be forwarded to the Director of Public Instruction, Bengal, and Commissioners of Divisions, and through them to District and Subdivisional Officers, for information and guidance, that a copy be forwarded to the Municipal Department of this Government for information and for communication to District Boards and Municipalities, and that a copy be submitted to the Government of India in the Home Department for information.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

Offg. Secretary to the Govt. of Bengal.

FINAL FORECAST OF THE SUGARCANE CROP OF BENGAL, 1902-1903.

THE following note is published for general information.

W. C. MACPHERSON,

The 3rd February 1903. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Forecast on the Sugarcane Crop of Bengal, 1902-1903.

Explanatory.—An estimate of the amount of sugar produced from other sources than cane has been included in this report, but the information obtainable on this subject is not yet complete.

2. *The character of the season.*—The drought which commenced in the middle of September 1901 lasted till the end of February 1902. In March, the weather was generally seasonable, but in April there was excessive rain in East Bengal. May was a seasonable month, though East Bengal again got too much rain. The monsoon was late and the June rainfall was seriously defective, except in North and East Bengal. July was a seasonable month, but in August the fall was deficient in Bihar, Chota Nagpur, and in parts of the Burdwan and Presidency Divisions. In the following month, however, there was good rain in Bihar and Chota Nagpur; in Northern Bengal the fall was greatly in excess of the normal, while elsewhere it was, on the whole, slightly in defect. October was unusually dry, and the subsequent months have been marked by an almost total absence of rain throughout these Provinces. Excessive rain at the planting season caused some contraction of area, and damaged the young plants in parts of North and East Bengal; while a few districts in Bihar, on the other hand, suffered from drought. On the whole, the season has not been generally unfavourable to the sugarcane crop, though it has suffered in East Bengal and in some of the Bihar districts.

3. *Area sown.*—According to the estimates of the District Officers, which are summarised in Appendix I, the normal area under sugarcane in this Province now stands at 682,600 acres against 740,200 acres, as estimated in the preliminary forecast. The decrease is mainly due to a revised estimate from the Pabna district. Recent revisions have resulted in a large reduction of the estimated area under sugarcane, which in 1901 was reported to be 843,400 acres. Of this area, 664,700 acres are estimated to have been planted with sugarcane this year. The decrease is due to the unfavourable character of the early part of the season.

4. *Character of the crop.*—As will appear from Appendix I, the crop in 11 districts (24-Parganas, Khulna, Rajshahi, Dinajpur, Gaya, Malda, Bhagalpur, Sonthal Parganas, Balasore, Hazaribagh, and Singhbhum) is estimated at or above the normal. In seven (Bankura, Hooghly, Jalpaiguri, Dacca, Champaran, Darbhanga, and Cuttack) it is estimated at between 90 and 99 per cent., in 16 others it varies between 80 and 89 per cent., and in the rest, excepting Angul (which shows only half the average outturn), between 63 and 76 per cent. Since the publication of the preliminary forecast on this crop in August last, the prospects of the crop have improved in 8 districts and deteriorated in 18, while in the remaining 19 districts they remain unchanged. According to the estimates submitted by the District Officers, the outturn for the whole Province will amount to only 89 per cent. of the normal. In the preliminary forecast, published in August 1902, I anticipated a 94 per cent. outturn for the Province, but having regard to the unfavourable weather which has since prevailed, I now estimate the Provincial outturn at 92 per cent. of a normal crop.

5. *Gross outturn.*—Taking the Provincial outturn at 92 per cent. of the normal, the probable gross outturn of cane *gur* will amount to 13,453,500 cwts. as compared with 13,528,200 cwts. produced last year. The total amount of raw sugar or *gur* produced in these Provinces from pate-palm is estimated by the District Officers at 2,877,834 cwts., and that from palmyra-palm and other sources at 4,255 cwts.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; 〓, fog; o, overcast.

No. 201—207, dated Calcutta, the 30th January 1903.

RESOLUTION—By the Government of India, Home Department.

THE need of an Imperial Library in India which should be open to the use of the public has for some time past engaged the attention of the Governor-General in Council, who has

been impressed by the limited character of the facilities for research which are available to the student in this country. The Imperial Library in the Civil Secretariat Buildings at Calcutta, formed a few years ago from the different Departmental Libraries, has proved of some service in this direction, and the marked increase in recent years in the number of persons making use of it affords satisfactory evidence of the appreciation which would be extended to an institution worthy of the name of an Imperial Library. With the approval of the Secretary of State, the Governor-General in Council has accordingly decided to establish such a library at Calcutta, a suitable building has recently been acquired for its accommodation, and the books and shelves of the Calcutta Public Library which had long ceased to fulfil the intentions of its founders have been purchased from the proprietors. These arrangements were confirmed and validated by the Imperial Library Act, 1902 (I of 1902). The existing Imperial Library will form the nucleus of the new institution, which will be provided with Reading Rooms, public and private, as at the British Museum and Bodleian Libraries. It is intended that it should be a library of reference, a working place for students, and a repository of material for the future historians of India, in which, so far as possible, every work written about India at any time can be seen and read.

2. The rules appended to this Resolution have been framed to give effect to the views of the Government of India in establishing the library. The control of the institution will remain with the Government of India, but its internal management will be delegated to a Council, with the Librarian as its Secretary, and His Excellency the Governor-General in Council has been pleased to appoint the following gentlemen to be the first members of this body:—

The Honourable Mr. T. Raleigh, C.S.I. . .	*Chairman.*
The Honourable Mr. Justice Guru Das Banerji	*Members.*
The Secretary to the Government of India, Home Department.	
Mr. M. Finucane, C.S.I., Commissioner, Presidency Division.	

ORDER.—Ordered that a copy of this Resolution be forwarded to the officers named above and to the Government of Bengal and the High Court, Calcutta, for information.

Ordered also that the Resolution be published in the *Gazette of India*.

IMPERIAL LIBRARY RULES.

1. The Library will be open to any person who holds a reading ticket issued to him by the Librarian in accordance with such regulations as may from time to time be made by the Council.

II. Reading tickets will not be issued to any person under 18 years of age. They will remain in force until cancelled by the Council and will not be transferable. Any person who infringes these rules or any regulations made by the Council for the internal management of the Library will be liable to have his ticket suspended by the Librarian pending a reference to the Council.

III. Subject to the provisions of rule IV, no book or other document shall be taken out by any person except with the permission of the Librarian to be given in accordance with any general or special orders made by the Council in this behalf.

IV. Any of the proprietors of the former Calcutta Public Library shall be entitled when resident in Calcutta to take out books from among those transferred from that Library to the Imperial Library, subject to the restriction that he shall not take out more than six works (up to a limit of 12 volumes) at a time.

V. Books and other documents that have been taken out are liable to recall at any time, but if not so recalled, they may be kept for a space of one month, which may be extended by the Librarian at his discretion.

VI. The Library will be open to the public from 10 A.M. to 7 P.M. on working days, and from 2 to 5 on such Sundays and holidays as the Council may determine.
